

CODING HALAMAN DEPAN WEB

Controller Halaman depan

Pertama Kita Buat Controllerya dengan mengetik di terminal :

```
php artisan make:controller BerandaController
```

Kedua di folder Route -> web.php

```
Route::get('/beranda', [BerandaController::class, 'index'])->name('beranda.index');
```

```
<?php
```

```
namespace App\Http\Controllers;
```

```
use App\Models\Slide;
```

```
use App\Models\Artikel;
```

```
use Illuminate\Http\Request;
```

```
class BerandaController extends Controller
```

```
{
```

```
public function index()
```

```
{
```

```
    $slide = Slide::all(); //sesuaikan Slide:: dengan Tabel gambar yang di buat
```

```
    $artikel = Artikel::all();
```

```
    return view('beranda', compact('slide', 'artikel '));
```

```
}
```

```
}
```

Kode di view untuk slide carusel

```
<div id="myCarousel" class="carousel slide mb-6 mt-4" data-bs-ride="carousel">
```

```
<div class="carousel-indicators">

  @foreach ($slide as $index => $item)

    <button type="button" data-bs-target="#myCarousel" data-bs-slide-to="{{ $index }}"

      class="{{ $index == 0 ? 'active' : '' }}" aria-current="{{ $index == 0 ? 'true' : 'false' }}"

      aria-label="Slide {{ $index + 1 }}">

    </button>

  @endforeach

</div>
```

```
<div class="carousel-inner">

  @foreach ($slide as $index => $item)

    <div class="carousel-item {{ $index == 0 ? 'active' : '' }}">

      <div class="container">

        <div class="carousel-caption text-start">

          <h1>{{ $item->nama }}</h1>

          <p class="opacity-75">Some representative placeholder content for the slide.</p>

          <p><a class="btn btn-lg btn-primary" href="#">Sign up today</a></p>

        </div>

      </div>

    </div>

  @endforeach

</div>
```

```
<button class="carousel-control-prev" type="button" data-bs-target="#myCarousel" data-bs-
slide="prev">

  <span class="carousel-control-prev-icon" aria-hidden="true"></span>

  <span class="visually-hidden">Previous</span>

</button>

<button class="carousel-control-next" type="button" data-bs-target="#myCarousel" data-bs-
slide="next">

  <span class="carousel-control-next-icon" aria-hidden="true"></span>

  <span class="visually-hidden">Next</span>

</button>

</div>
```

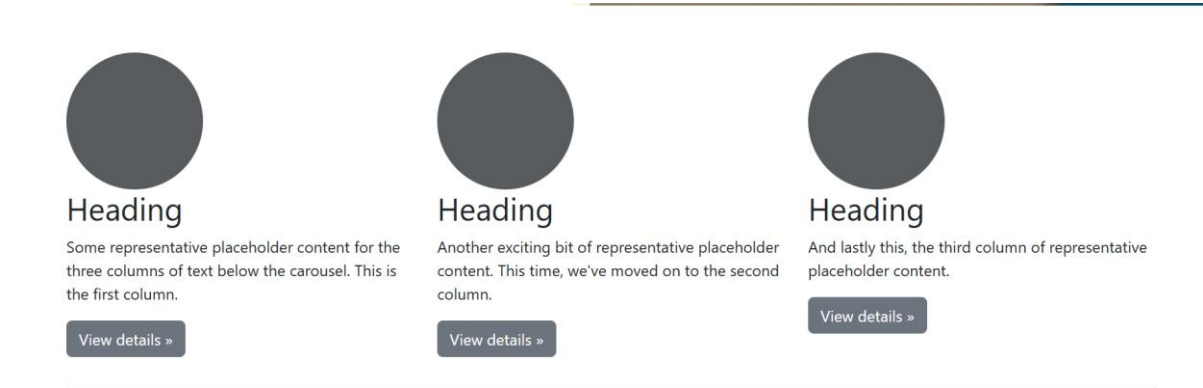

Contoh pengguna artikel atau card website

```
public function index()
{
    $slide = Slide::all();

    $artikel = Artikel::all(); //sesuaika Slide:: dengan Tabel gambar yang di buat

    return view('beranda', compact('slide',' artikel '));
}
```

Tampilan Awal masih ada 3 card

```
<!-- Three columns of text below the carousel -->
<div class="row">
  <div class="col-lg-4">
    <svg class="bd-placeholder-img rounded-circle" width="140" height="140"
      xmlns="http://www.w3.org/2000/svg" role="img" aria-label="Placeholder"
      preserveAspectRatio="xMidYMid slice" focusable="false">
      <title>Placeholder</title>
      <rect width="100%" height="100%" fill="var(--bs-secondary-color)" />
    </svg>
    <h2 class="fw-normal">Heading</h2>
    <p>Some representative placeholder content for the three columns of text below the carousel. This is the first column.</p>
    <p><a class="btn btn-secondary" href="#">View details &raquo;</a></p>
  </div><!-- /.col-lg-4 -->
  <div class="col-lg-4">
    <svg class="bd-placeholder-img rounded-circle" width="140" height="140"
      xmlns="http://www.w3.org/2000/svg" role="img" aria-label="Placeholder"
      preserveAspectRatio="xMidYMid slice" focusable="false">
      <title>Placeholder</title>
      <rect width="100%" height="100%" fill="var(--bs-secondary-color)" />
    </svg>
    <h2 class="fw-normal">Heading</h2>
    <p>Another exciting bit of representative placeholder content. This time, we've moved on to the second column.</p>
    <p><a class="btn btn-secondary" href="#">View details &raquo;</a></p>
  </div><!-- /.col-lg-4 -->
  <div class="col-lg-4">
    <svg class="bd-placeholder-img rounded-circle" width="140" height="140"
      xmlns="http://www.w3.org/2000/svg" role="img" aria-label="Placeholder"
      preserveAspectRatio="xMidYMid slice" focusable="false">
      <title>Placeholder</title>
      <rect width="100%" height="100%" fill="var(--bs-secondary-color)" />
    </svg>
    <h2 class="fw-normal">Heading</h2>
    <p>And lastly this, the third column of representative placeholder content.</p>
    <p><a class="btn btn-secondary" href="#">View details &raquo;</a></p>
  </div><!-- /.col-lg-4 -->
</div><!-- /.row -->
```

Ubah jadi satu Card

```
<div class="col-lg-4">
  <svg class="bd-placeholder-img rounded-circle" width="140" height="140"
    xmlns="http://www.w3.org/2000/svg" role="img" aria-label="Placeholder"
    preserveAspectRatio="xMidYMid slice" focusable="false">
    <title>Placeholder</title>
    <rect width="100%" height="100%" fill="var(--bs-secondary-color)" />
  </svg>
  <h2 class="fw-normal">Heading</h2>
  <p>Some representative placeholder content for the three columns of text below the carousel. This is
  | the first column.</p>
  <p><a class="btn btn-secondary" href="#">View details &raquo;</a></p>
</div><!-- /.col-lg-4 -->
```

Masukan coding ya. Tag HTML <svg> ubah jadi tag HTML

Tampilan di halaman depan web

```
@foreach ($slide as $index => $item)

  <div class="col-lg-4">

    <h2 class="fw-normal">{{ $item->judul }} </h2>

    <p>{{ $item->konten }} </p>

    <p><a class="btn btn-secondary" href="#">View details &raquo;</a></p>

  </div><!-- /.col-lg-4 -->

@endforeach
```
